

# Quarry Ridge - Trail Work

## 10/23 through 10/25

### ~8:00 am to ~6:00 pm

We will be adding and enhancing more trail features at Quarry Ridge. Improvements are planned for most all of the trails in addition to repairing any erosion or drainage issues and clearing brush. Initial plans are as follows:

- Improving the end of Bottoms Up and adding berms
- Removing brush/stumps from Dizzy and adding dirt to berms
- Reworking and enhancing Drop Zone and B. Line
- Adjusting the bottom of Three Sisters (both lines)

We will be using an excavator to move most of the material and do all of the heavy lifting. Volunteers will primarily do the final shaping and smoothing of the dirt. Any help is appreciated. Most volunteers assist for 3-5 hours on a given day. With many volunteers, we are able to accomplish a lot!

Closer to the date and throughout the weekend, we will be posting up more exact details (facebook and forums) updating volunteers on when and where you can find us to help out.

Bring gloves and water!

Please note that portions of the trail will be closed intermittently as we work on them throughout the weekend.

**Capital Off Road Pathfinders (CORP)**
